

Confirmed Posters:

Corresponding Author	Title	Theme	Poster Stand number
Euclides Minella	A Century of Barley Research and Breeding in Brazil	Barley breeding: success stories	34
Ping Yang	Success in breeding for bymovirus resistance barley varieties – achieving the same goal with different strategies in Europe and China	Barley breeding: success stories	35
Duane Falk	Re-Domesticating Barley: a small step for genetics and a giant leap for barley breeding	Barley breeding: success stories	36
Jörg Plieske	Genotyping of barley using optimized SNP arrays	Barley breeding: success stories	37
Andrea Visioni	MEDWHEALTH: high amylose durum wheat and a recently naked high β -glucan barley variety to produce healthier traditional food representing Mediterranean heritage.	Barley end uses: from food and feed to malting, brewing, and novel products	38
Mara Bleidere	Comparative evaluation of the grain chemical composition of hullless barley varieties	Barley end uses: from food and feed to malting, brewing, and novel products	39
Michael Panting	Knockout mutation of protease inhibitors using CRISPR/Cas9 for better protein digestibility of barley grain as feed.	Barley end uses: from food and feed to malting, brewing, and novel products	40
Blanca Gómez-Guerrero	Pasting properties of barley and malt as a tool for barley selection varieties with good malt quality	Barley end uses: from food and feed to malting, brewing, and novel products	41
Linda Legzdina	Breeding for heterogeneous spring barley populations: first results on some improvement methods	Genetic and database resources: harnessing diversity	42
Laura Paire	Characterisation of a diverse panel of barley varieties under Irish organic conditions to identify key traits for multi end-uses	Genetic and database resources: harnessing diversity	43
David Stuart	Rapid identification of causal mutations by whole genome sequencing of F2 phenotypic bulks	Genetic and database resources: harnessing diversity	44
Ping Yang	A reference-guided TILLING by amplicon-seq platform supports forward and reverse genetics in barley	Genetic and database resources: harnessing diversity	45
Ping Yang	BarPlex v1.0: a multiplex PCR-based enrichment of genome-wide short segments that enable genetic studies in barley	Genetic and database resources: harnessing diversity	46
Alejandra Cabeza	QTL analysis of root traits in seedlings of a barley RIL population	Genetic and database resources: harnessing diversity	47
Ernesto Igartua	Agroclimatic distribution of barley landraces over the Mediterranean basin	Genetic and database resources: harnessing diversity	48
Francesc Montardit-Tarda	GWAS meta-analysis for agronomic traits in two-rowed spring barley	Genetic and database resources: harnessing diversity	49
Che-Wei Chang	Environmental association mapping as an approach to characterize and utilize exotic barley germplasm	Genetic and database resources: harnessing diversity	50
Giuseppe Sangiorgi	Genome wide association mapping identifies major QTLs affecting seminal root traits in barley	Genetic and database resources: harnessing diversity	51
Yu Guo	Six-rowed wild-growing barleys are hybrids of diverse origins	Genetic and database resources: harnessing diversity	52
Mats Hanson	Studies of barley viridis-k mutants connect a C-type ferredoxin to chlorophyll biosynthesis	Genetic and database resources: harnessing diversity	53
Hrannar Smári Hilmarsson	Naked barley in Iceland	Genetic and database resources: harnessing diversity	54
