

ANNOUNCEMENT

13th International Barley Genetics Symposium

July 3rd - 7th, 2022, Riga, Latvia

**Dear participants of the SYMPOSIUM,
We are delighted to announce that
registration is open now!**

<https://www.ibgs.arei.lv>

IBG symposiums have been organized since 1963 and attracted participants from all around the world to discuss progress of their state of the art research. Its 12 sessions will include the recent and most important findings from the hottest topics in various thematic sessions

- The barley genome ;
- Biotic stresses under Climate Change;
- Abiotic stresses under Climate Change;
- Barley breeding and NBTs: a way forward;
- Barley breeding: success stories;
- Genetics and breeding of biomass;
- Barley end use: food, feed, and novel products;
- Barley end use: malting and brewing;
- Genetic and database resources: harnessing diversity;
- Morphology, phenology, and development;
- Baltic and Nordic barley: perspective.

On the final day of the symposium Barley Field Day will be organized with a possibility for participants to observe their material in Latvian conditions.
